Gluco balance

Too much fat storage on the body?

In unusual spots such as on mane and tail
implant and behind the shoulders?
Movements are painful and sensitive?
Horses that seem to gain weight from nothing?
Stretched stance?
Fatigue? Disinclined to work?
But always hungry?

Sugars!

These symptoms can all indicate a problem with the glucose metabolism. These are often caused by a higher absorption of sugars and starch from the food. An important culprit is the fructosamin from grass and hay.

PHYTONICS GLUCO BALANCE

supports the glucose metabolism and the proper functioning of pancreas and intestines. In this metabolism also the liver plays an important role. The herbs *Berberis vulgaris*, Broccoli, Our-Lady's thistle, Hazelnut leaves, Artichoke and Rosemary stimulate the purifying function of the liver. The metabolism is positively influenced by Cinnamon and Hibiscus. Also the minerals Phosphorus, Iodine, Magnesium citrate, Manganese, Selenium, Zinc citrate and various vitamins support the transformation processes in the body.

Because the glucose metabolism is related to the hormonal system, Phytonics Gluco balance also contains Chasteberry and the minerals Potassium and Copper. The stomach is supported by the presence of Fennel, Liquorice, *Urtica urens* and Ginger.

Gluco Balance is one of the best supplements for frugal breeds that have trouble keeping a healthy weight.
